Subject: sampling at dairy farm in Wisc.

Proposed response: EPA staff are conducting groundwater monitoring for nitrates and other contaminants in the Central Sands area. The estimated number of vehicles on site is 5, not 50.

Subject: Press Inquiry

Hello Ms. Rowan,
I left you a voicemail message, but I know some people prefer email. I have been told there are about 50 EPA trucks drilling at the Central Sands Dairy in Armenia (Nekoosa) Wisconsin. Can you tell me what is going on?
My cellphone is 715-297-7537. That would be the best way to reach me today.
Thank you,

Karen Madden
